System requirements for License Management PC

System	Requirement
Operating system(OS)	Windows 32bit/64bit <ul style="list-style-type: none">• Windows 11• Windows 10• Windows Server 2022• Windows Server 2019• Windows Server 2016
CPU	1GHz or more
RAM	1GB RAM or more
System Drive	Free space 200MB

Regarding the License Management PC:

- Virtual machines and containers are not supported.**
- Only one type of license can be applied to a single license management PC.
- It is possible to use neoROSET on the license management PC. In this case, please refer to the system requirements of neoROSET. By install neoROSET, you can skip the installation of CodeMeter Runtime mentioned later. Please proceed with the procedure from "P.12 [Floating] How to Apply (1)."

**After this page,
documenting tasks on License Management PC.**

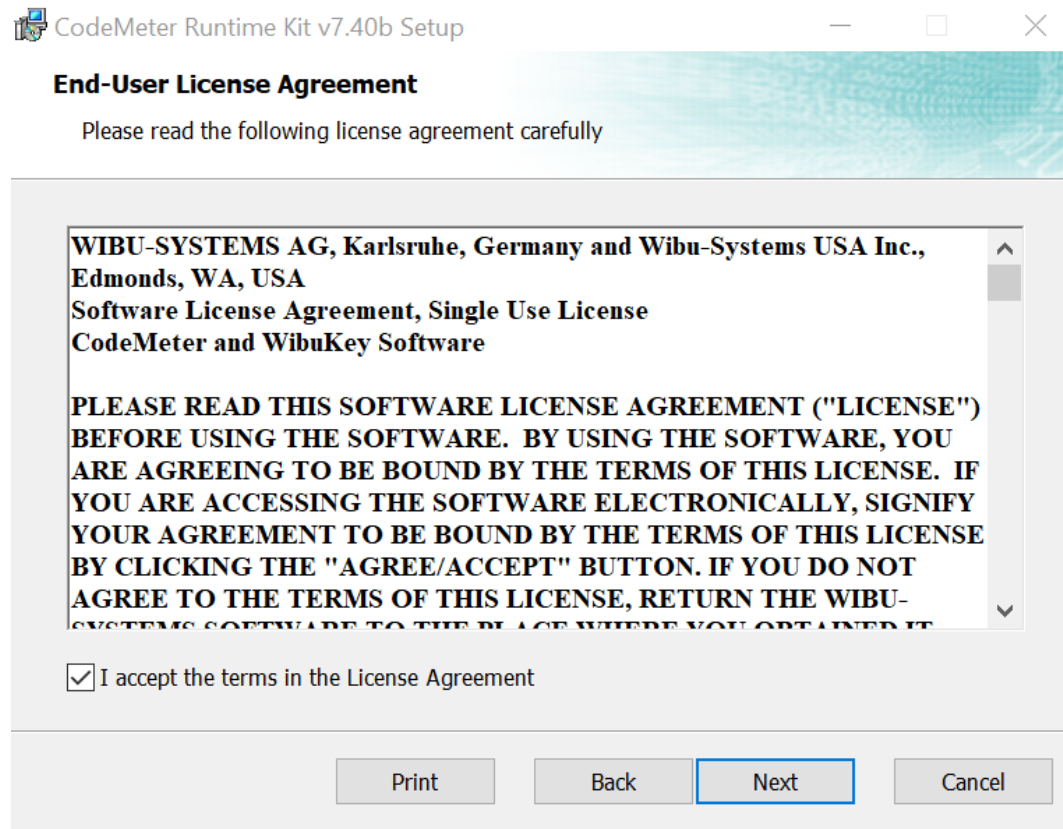

【Floating】 Install CodeMeter Runtime (1)

- ① Run the enclosed "CodeMeterRuntime.exe" and click "Next".

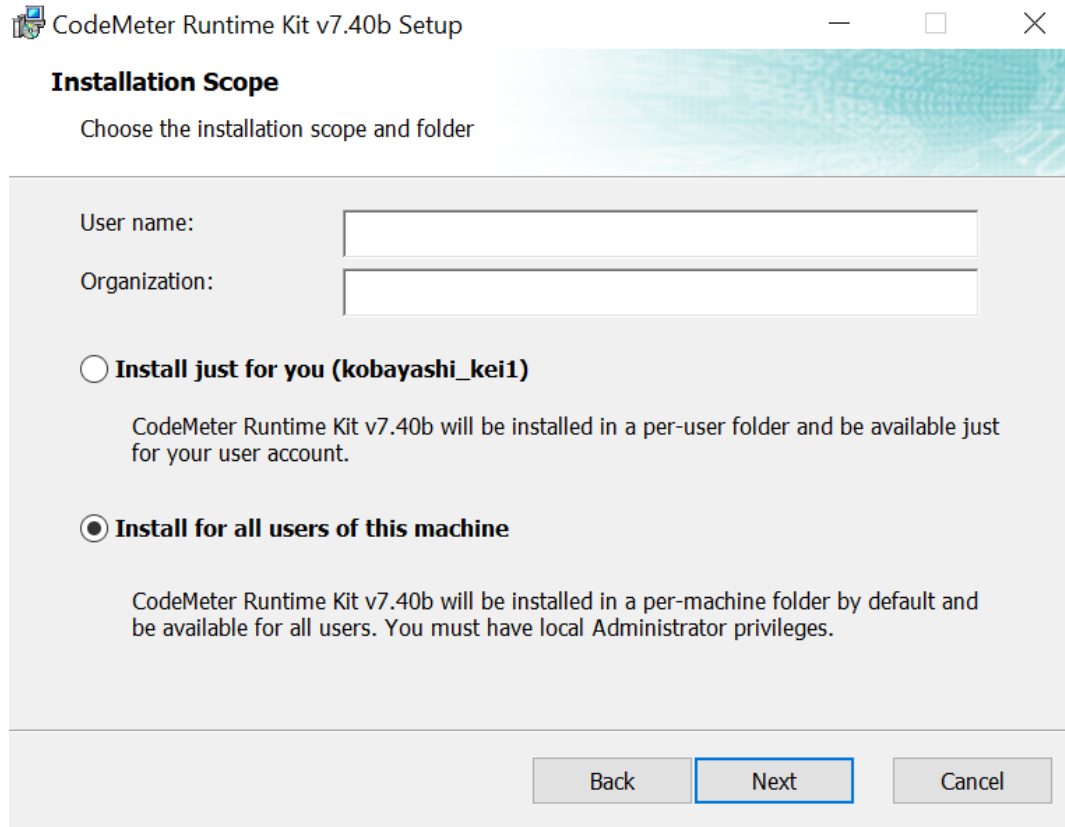

【Floating】 Install CodeMeter Runtime (2)

- ② Check "I accept the terms of the License Agreement" and click "Next".

【Floating】 Install CodeMeter Runtime (3)

③ Click “Next”.

The image shows a Windows installation window titled "CodeMeter Runtime Kit v7.40b Setup". The window has a standard Windows title bar with minimize, maximize, and close buttons. The main content area is titled "Installation Scope" and contains the instruction "Choose the installation scope and folder". Below this, there are two input fields: "User name:" and "Organization:". Underneath these fields, there are two radio button options. The first option is "Install just for you (kobayashi_kei1)" and the second option is "Install for all users of this machine", which is currently selected. Below each radio button option is a descriptive paragraph. At the bottom of the window, there are three buttons: "Back", "Next", and "Cancel". The "Next" button is highlighted with a blue border.

CodeMeter Runtime Kit v7.40b Setup

Installation Scope

Choose the installation scope and folder

User name:

Organization:

☐ **Install just for you (kobayashi_kei1)**

CodeMeter Runtime Kit v7.40b will be installed in a per-user folder and be available just for your user account.

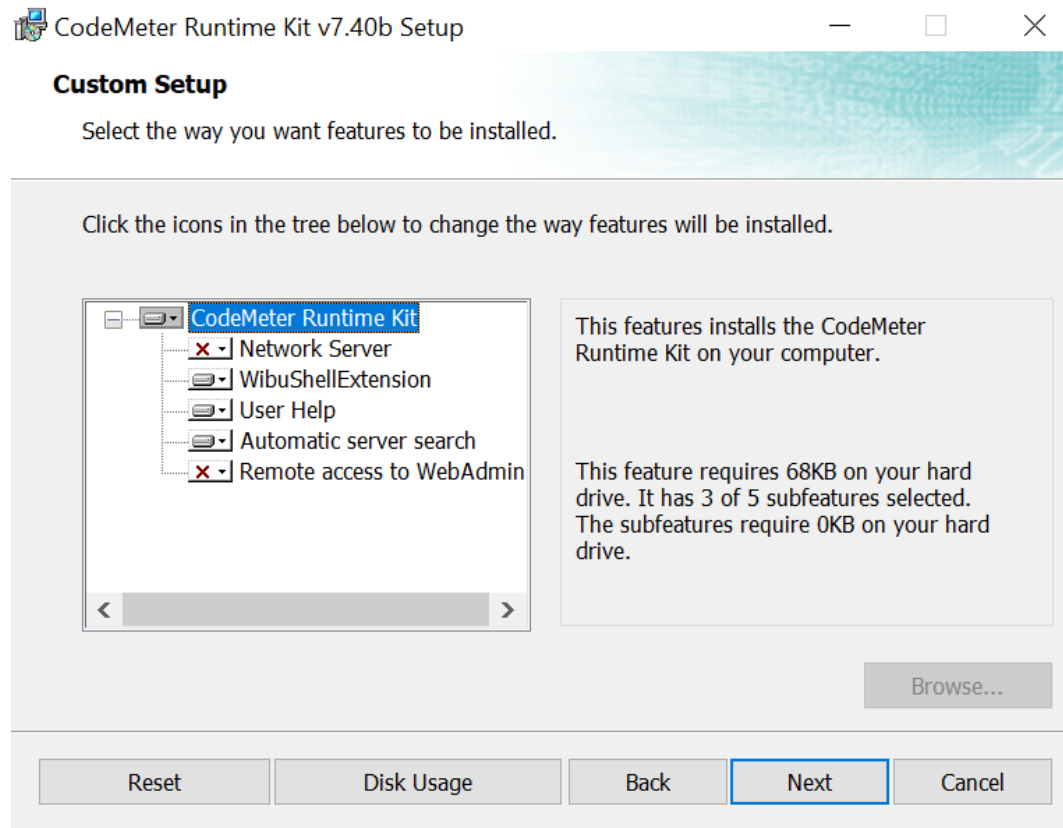

☒ **Install for all users of this machine**

CodeMeter Runtime Kit v7.40b will be installed in a per-machine folder by default and be available for all users. You must have local Administrator privileges.
